

10 REASONS TO CHOOSE

NEAR DRY ROUTING

- 1** Totally eliminates flood coolant systems and all their associated expenses, including disposal of old oils.
- 2** Tool life significantly extended.
- 3** Achieves a greatly improved surface finish.
- 4** Easy to install, inexpensive run.
- 5** Retrofits to any brand of routing machine.
- 6** Clean dry chips are produced.
- 7** Operates on Coolube 2210, a high grade vegetable oil which is non hazardous, non toxic, non polluting, non drying and non staining
- 8** Absolutely suitable for all metal, both ferrous and non ferrous, including stainless steel and exotic metals.
- 9** Consumes approx 20-30ml of oil per hour of continuous routing.
- 10** An environmentally clean, green and safe solution to hazardous flood coolant
