

10 REASONS TO CHOOSE

NEAR DRY ENGRAVING

- 1** Allows higher spindle speeds and depth of cut
- 2** Able to run at faster feed rates
- 3** Achieves a greatly improved surface finish including plastics.
- 4** Extends tool life significantly.
- 5** Easy to install, inexpensive to run.
- 6** Retrofit to any brand of engraving machine.
- 7** Operates on Coolube 2210, a high grade vegetable oil which is non hazardous and biodegradable
- 8** Consumes approx 2ml of oil per hour of continuous engraving.
- 9** Absolutely suitable for all metals, both ferrous and non ferrous, including stainless steel.
- 10** An environmentally clean, green and safe solution.
